

THE CROSSFIELD ONICLE.

VOL. XXII. No. 25.

CROSSFIELD, ALBERTA. THURSDAY, JUNE 20th, 1929.

PRICE \$2.00 A YEAR.

The 1929 Model of the McCORMICK DEERING TRACTOR IS NOW AVAILABLE

This engine, while similar to the models now in use, has many new features and improvements. Both weight and horse power have been greatly increased, so that we have ample power for four plow work and sufficient for the 28 inch separator in the toughest grain.

The engine still has the famous power take off for use with the power binder and other machines. This is an integral part of the machine and does not cost extra.

The engine is sold at the same price as formerly \$1,375 cash

Results of School Sports Held At Community Hall

A very successful sports day was held at the East Community Hall on Friday, June 7th, in which the following schools competed for honors: Elba, Floral, O'Neil, Rodney and Mead.

The school winning the trophy with 68 points was Rodney taught by Mr. A. Fredell.

1. Dashes—
(a) Boys, 8 yrs. and under—1 Cecil O'Neil; 2, Frank Treca; 3, Howard Rogers.
(b) Girls, 8 yrs. and under—1 Evelyn Cochrane; 2, Lita Bennett; 3, Doris Brown.
(c) Boys, 10 yrs. and under—1 Lila Heine; 2, Bernard Heine; 3, Douglas Robinson.
(d) Girls, 10 yrs. and under—1 Sylvia Richardson; 2, Lily Witt; 3, Veronica Mason.

(e) Boys, 12 yrs. and under—1 Lila Heine; 2, Bernard Heine; 3, Tom Robinson.

(f) Girls, 12 yrs. and under—1 Sylvia Richardson; 2, Emma Heine; 3, Linda Treca.

(g) Boys, Open Class—1, Alfred Ohlhausen; 2, Victor Schubart; 3, William Van Lare.

(h) Girls, Open Class—1, Louise Robinson; 2, Alice O'Neil; 3, Peggy Cavander.

2. Relay—1, Rodney team; 2, Floral team; 3, Meadows team.

3. Running Broad Jump—(a) Boys, 10 yrs. and under—1, Bernard Heine; 2, Lila Heine; 3, Douglas Robinson.

(b) Girls, 10 yrs. and under—1, Veronica Mason; 2, Sylvia Richardson; 3, Melva English.

(c) Boys, Open Class—1, Alfred Ohlhausen; 2, Victor Schubart; 3, Albert Heine.

(d) Girls, Open Class—1, Louise Robinson; 2, Mary O'Neil; 3, Ann Aaskow.

4. Standing Broad Jump—(a) Boys, 10 and under—1, Lila Heine; 2, Bernard Heine; 3, Douglas Robinson.

(b) Girls, 10 and under—1, Sylvia Richardson; 2, Edna Ableman; 3, Melva English.

(c) Boys, Open Class—1, Alfred Ohlhausen; 2, William Van Lare; 3, Harold Orom.

(d) Girls, Open Class—1, Louise Robinson; 2, Anne Aaskow; 3, Margaret Miller.

5. High Jump—(a) Boys, 10 and under—1, Bernard Heine; 2, Lila Heine; 3, David Schubart.

(b) Girls, 10 and under—1, Sylvia Richardson; 2, Edna Ableman; 3, Mary Treca.

(c) Boys, Open Class—1, Albert Heine; 2, William Van Lare; 3, Alfred Ohlhausen.

(d) Girls, Open Class—1, Mary O'Neil; 2, Louise Robinson; 3, Peggy Cavander.

6. Hop, Step and Jump—(a) Boys, Open Class—1, Victor Schubart; 2, Alfred Ohlhausen; 3, Albert Heine.

(b) Girls, Open Class—1, Louise Robinson; 2, Anne Aaskow; 3, Margaret Miller.

7. Three-legged Race—1, Emma Heine, Julia Stamp; 2, Albert Heine; 3, Victor Schubart; 4, Alfred Ohlhausen.

8. Wheelbarrow Race—1, Alfred Ohlhausen, Victor Schubart; 2, Albert Heine; 3, Bert Rogers, Malcolm Miller.

9. Sack Race—1, Julia Stamp; 2, Albert Heine; 3, Alfred Ohlhausen.

10. Baseball Throw—(a) Boys, Open Class—1, William Van Lare; 2, Alfred Ohlhausen; 3, William Richards.

(b) Girls, Open Class—1, Margaret Miller; 2, Anne Aaskow; 3, Lydia Kinnell.

11. Horse Shoe—1, O'Neil team; 2, Elba team.

Individual Championship Medals

Boys—Alfred Ohlhausen 25 pts

Girls—Sylvia Richardson 23 pts

Tie—Louise Robinson 23 pts

School winning trophy—Rodney, 68 points.

Mr. Fisher of Acme suffered a serious mishap on Wednesday night, when the Hudson sedan in which he was driving turned turtle on the main road about a mile north of town. Suffering from the shock Mr. Fisher was able to take the key from the car and walk a short distance to a farm house. But on returning to the car he collapsed and was found some time later by a local man. The car was hauled into Baker's garage in an extremely damaged condition with most of the glass shattered and the top almost crushed in.

MASONIC MEMBERS GIVEN WELCOME

One of the largest and most unique gatherings in Masonic history took place in Crossfield on Tuesday evening, June 18th, when the members of Crossfield Lodge No. 45, A. F. & A. M., were hosts to over 125 visiting brethren. Calgary Lodge No. 22 were invited to attend with their degree team and put on the work, which was done in an excellent manner.

As visiting brethren are cordially invited, many took advantage of this special occasion and when the register was checked up it was found that over thirty lodges were represented in the gathering. Besides Calgary Lodge No. 22 eight other Lodges from Calgary were represented. Added to these were eight more Alberta Lodges, namely: Carstairs, Didsbury, Olde, Bowden, Wetaskiwin, Acme, Lethbridge and Rosebud. Those from outside points represented were Creston Lodge and Lloydminster Lodge, Perdue Lodge and Saskatoon Lodge, Wetaskiwin; Fortage is Prairie Lodge, Manitoba; Sage Lodge, Montana; Elmo Lodge, Iowa, and four from Bonnie Scotland, namely, Kenmuir, St. John, Mother Kil Winning, Polmont and Houston. St. Johnstone Mother Lodge from Scotland is the oldest Masonic Lodge in Scotland.

Two Past District Deputy Grand Masters were present, being R.W. Bro. Grainger of Carbon, Dist. No. 15, and R.W. Bro. Davis of Calgary, Dist. No. 1.

Calgary No. 3 brought their lodge orchestra and a full list of entertainers and after the Crossfield brethren had satisfied the "inner man" of their guests with a sumptuous repast, all present were entertained with songs, readings and musical selections till the " wee sma' hours of the morn'g."

WEDDING BELLS

GAZELEY-HOUGHTON

A very pretty wedding was solemnized at Horn Hill Farm, east of Red Deer, when Marjorie Houghton, eldest daughter of Mr. and Mrs. J. C. Houghton was married to Perle James Gazeley, son of Mr. and Mrs. J. E. Gazeley of Durand, Wis., at 1:30 o'clock Saturday, June 8th.

The bride came down the stairs on the arm of her father, to the soft strains of Lohengrin's Bridal March, played by Mary Anne Gazeley, of Crossfield, niece of the groom. The ceremony took place on the verandah of the beautiful Houghton home and the guests viewed the proceedings from the lawn. The bride was charmingly attired in a beige georgette and lace tulle gown with hat to match and carried a bouquet of deep pink Columbia roses. Miss Ella Houghton, sister of the bride, who came from Iowa to attend the bride, was gowned in a beautiful pink and white georgette dress with hat to match. Her flowers were pink and white carnations. Mr. Less Lyons, of Calgary, acted as best man.

A dainty lunch was served to relations and friends of the young couple. The bride's table was centered with a three tier wedding cake surrounded by pink and white tulle and pink roses and tall pink tapers in silver holders with pink streamers.

Mrs. Houghton, mother of the bride was gowned in a beige georgette combined with lace. The bridegroom's gift to the bride was a vanity case and to the best man a pearl stick pin. Rev. Smille of Horn Hill performed the ceremony. Mr. McKinnon, an old time friend, proposed the toast to the bride, and Mr. G. Vince, a pal in the army, proposed the toast to the groom, which was responded to by the latter.

The bride and bridegroom were the recipients of many lovely gifts, consisting of an unusual amount of silver, among them a silver tea service from relatives in Iowa and a set of silverware from relatives at Crossfield. The staff of the Premier Motors, Calgary, where the groom is employed, presented them with a beautiful piano lamp.

The guests numbered about seventy-five and consisted of relatives and immediate friends. Those attending from Crossfield were: Mr. Guy Gazeley, brother of the groom and Mrs. Gazeley, also Howard, Alice, Florence and Mary Anne Gazeley, nephew and nieces of the groom. Immediately after the reception Mr. and Mrs. Gazeley left for Calgary, after which they are motoring to the coast and Western States. On their return they will reside in Calgary.

Automobile Accidents

The summer months of July and August undoubtedly witness the heaviest automobile traffic throughout Western Canada. It is during this period that tourist traffic is greatest with "foreign" cars in large numbers from other Provinces and the United States crossing and re-crossing these prairies. They come from Provinces and States where traffic regulations frequently are different from those in force in these Western Provinces. During this mid-summer period, too, what we may term "domestic" traffic is at its peak. Roads are at their best, and following the closing of the schools many of our people tour "on family," while week-end journeyings to summer resorts are much in vogue.

While care in driving is at all times necessary, and with the steady increase in the number of cars in use is becoming a more and more vital matter, it is nevertheless the case that during these summer months extra care should be taken.

There are certain factors to which special attention should be paid, and the importance of which are reinforced as a result of careful investigations into the cause of auto accidents carried out during a period of years. For example, one would naturally suppose that the majority of such accidents occur on bad roads, at intersections, curves, etc., but statistics prove that the majority of accidents occur on the so-called "safe" parts of the highways. Apparently drivers are careful on curves and badly surfaced roads, and let themselves go on straight, smooth stretches.

Statistics compiled in the State of Iowa in regard to accidents are certainly illuminating: 10,666 accidents occurred on straight-away stretches where the drivers of the colliding cars had a clear view of the objects with which they were colliding.

7,885 occurred at intersecting roads, most of which were due to the fact that one or both vehicles approached the intersections at speeds too great to be checked upon perceiving the approach of the second car.

3,566 were caused by failure to grant the right-of-way at street crossings.

940 occurred on curves, caused by the drivers of the two vehicles going in opposite directions "hugging" the "inside" of the bend in the road to help them maintain high speed.

1,169 resulted from driving on the wrong side of the road.

117 were caused by cutting corners.

1,788 were caused while ascending and descending hills.

The roads were in the following conditions: 15,000 roads were good; 593 were rough; 3,196 were wet; 483 were covered with snow; 1,018 were icy; 186 were sandy; 51 were muddy.

These figures seem to fairly establish the fact that the better the roads, the greater the number of accidents. In other words, where roads are not good, drivers are forced to exercise care, and because care is exercised accidents are reduced to a minimum notwithstanding that conditions existing would naturally predispose to accidents, but where roads are good, drivers become careless, even reckless, and, sooner or later, the inevitable result is an accident.

With the present insistent demand everywhere for more good roads, and a still higher standard of good roads, coupled with the increasing power of cars and their enormous increase in number, the accident toll on highways is mounting higher and higher. The cause is the very reverse of what might have been expected. It is not defects in car manufacture, because cars themselves are stronger than ever before. It is not road conditions which presumably might ditch a car, overturn or damage it.

No, it is the human element that is responsible for the mounting toll of accidents. Instead of reaping the benefit of the vast improvements being made, drivers are becoming more and more careless, taking ever greater chances, becoming less considerate of the other fellow's rights, determined to secure "speed" at all hazards.

Think it over the next time you are tempted to "step on the gas" for the sole purpose of seeing and boasting of what your car can do. It may do something you least desire and will never forget.

Help Yourself

Help yourself and the world will not treat you very badly. Helping yourself means thinking, knowing your job, and having other interests as well. It further means cultivating your brains by reading and learning something new. You will find plenty to occupy your time and thoughts, and thus you will never feel bored or dull.

Busy At Eighty-Two

At the death of 82, of Mrs. Flora Annie Steel, the great novelist of India, at Springfield, England, recently, she had just finished her autobiography, had half finished a novel, and had just published another, "The Curse of Eve," which gave her views on social problems.

When Pain Comes

What many people call indigestion, very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sour. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention. One spoonful of this harmless,

tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude materials again, when once you learn the efficacy of this. Go get a small bottle to try. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

Work On Branch Line To Mine

Commence Laying Steel On Line To Sheritt-Gordon Property

Commencement has been made on the laying of steel on the branch from Cranberry Portage to Sheritt-Gordon.

According to information, a very large gang engaged in the work, started laying the rails on the 50th mile stretch. Work will be rushed on the steel laying and it is anticipated that trains will be running into Cold Lake by September 1st.

The opening up of the Cold Lake branch will see active development on many mining properties lying between Cranberry and Cold Lake.

NERVE TORTURES

A Condition From Which Both Men and Women Suffer

Hardly any condition of ill health causes more real suffering than a shattered nervous system. Unfortunately, but little sympathy is shown for the sufferer, from the mistaken notion that the nerves can be controlled. Men and women with nerves out of gear often become irritable and are blamed for ill temper when it is not their fault.

Their poor health is the cause. The tired, over-worked wife and mother, whose household cares have worn her thin; the breadwinner whose anxieties have worried him until he is really ill; are among the nerve sufferers who become run-down. Their nerves, like all bodily organs, need rich, red blood. In all such cases the best and simplest treatment is a course of Dr. Williams' Pink Pills, which enriches the blood and builds up the nervous system and brings good health and cheerfulness. Mrs. M. Cross, Richmond, Que., tells how this medicine ended her nervous troubles. She says: "I have suffered from nervousness and dizzy spells, and the hundred and one things which in such a condition make life a misery. The first thing I found to help me was Dr. Williams' Pink Pills. Under the use of this medicine I found my nerves grew steadier, the dizzy spells grew less frequent, and I became brighter and more cheerful. I took the pills for some time and found that they enrich the blood, build up the nerves and are a fine medicine for both old and young."

You can get these pills through any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Five Points For Britain

Has Designed, Equipped and Operated Fastest Modes Of Travel

It is certainly a most remarkable fact that at this moment the fastest aircraft in the world (the seaplane which won the Schneider cup), the fastest motor car (the Daimler), the fastest motor car (the Golden Arrow), the fastest passenger liner (the Mauretania), and the fastest locomotive (a G. W. R. Express) are British in origin.

They are all five—British designed, equipped, and operated. We are glad that the British government's exhibit at the Toronto National Exhibition this year will show five models to remind the world of it.

Cramps Diarrhoea Pains in Stomach

Mr. Roy Lighthall, Milford, Ont., writes: "I became very ill; lost my appetite, had cramps, diarrhoea, and severe pains in my stomach. I purchased a bottle of Dr. Fowler's Wild Strawberry Cataplasms, and before I had taken half of it I was completely relieved. I have had no symptoms of the trouble since."

"I cannot praise 'The Extract' too highly, and will never be without a bottle of it in the house."

"My brother had the same experience with it as I had."

"Dr. Fowler's" has been on the market for the past 84 years; you need not experiment when you buy it. Price 50c a bottle at all dealers; put up only by The T. Millburn Co., Ltd., Toronto, Ont.

Wheat Pool Elevators

When the three provincial units of the Canadian Wheat Pool have completed their 1929 building programme they will be operating a combined total of 1,498 country elevators with a capacity of from 30,000 to 45,000 bushels each. Of this number, 1,498 will be in Saskatchewan, 390 in Alberta, and 163 in Manitoba.

For sunburn—apply Minard's Lintment.

It is complained that many business men write illegibly. A really busy man, of course, has no time to be constantly consulting a dictionary.

One of the component complaints of infants is worms, and the most effective application for them is Mother Graves' Worm Extirpator.

W. N. U. 1790

MADE IN THE WEST

Paulins HARMONY CHOCOLATES are GOOD and GOOD FOR YOU! Buy them by the pound At Your Grocer's

Britain Has New Industry

Factory In London, England, Makes Starchless Food From Beans

A factory now completed in North London, marks the beginning of a new British industry which might well attain the importance acquired in recent years by sugar beet or even artificial silk. There flour will be made from soy beans, whose acknowledged nutritive value has now, it is claimed, been made consistent with digestibility.

The soy bean is nearly all protein and fat, and it is devoid of the starch to which dyspepsia is commonly attributed. In protein it is four times richer than the best wheat, in fat twenty times richer.

In taste it reminds one of the almond, and bread containing it keeps longer than the ordinary bread. The probability is that it will be used also, as in Austria, for biscuits and confectionery, and the making of a new kind of chocolate.

Cars For Bolsheviks

Stated That Henry Ford Will Produce 900,000 Autos For Soviets

Henry Ford is to produce 100,000 cars a year for Soviet Russia under terms of a contract signed recently and made public in New York.

The contract will run for nine years and the factory will be established in Russia. Only the Ford passenger model "A" and the Ford truck model "A" will be manufactured. More trucks than passenger cars will be produced.

The factory is to be located at Nizhni Novgorod, on the Volga river, and will be completed within four years.

For Burns and Scalds.—Dr. Thomas' Electric Oil will take the fire out of a burn or scald. It should be at hand in every kitchen so that it may be available at any time. The preparation required. Just apply the oil to the burn or scald and the pain will abate and in a short time cease altogether.

New Picture Film Invented

Can Be Made Of Cloth and Is Washable

The housewife of the near future may say to her servant: "Bridget, put those photos of father in the wash and hang them on the line to dry. Be sure to iron them tomorrow, for he is coming on a visit and I want them to look nice and fresh."

Exactly that can be done with a new kind of picture film invented by Dr. R. W. Hochstetter, head of the Hochstetter laboratories.

His is a new invention for household purposes, but instead, is applying it to produce new types of sound picture films, and radio transmission of sound, photos and motion pictures. Several new processes are involved.

The first is making photographic film out of cloth, so that it is washable, ironable and non-inflammable. He says that cotton, silk, linen or even paper can be used.

Along with the new film Dr. Hochstetter announces invention of a process for reflecting sound and pictures from the face of the films, instead of transmitting light through film. He also has a different method of amplification of sound, to get further away from distortion.

The use of Miller's Worm Powders insures healthy children so far as the ailments attributable to worms are concerned. A high mortality among children is traceable to worms. These sap the strength of infants so that they are unable to maintain the battle for life and succumb to weakness. This preparation gives promise of health and keeps it.

Better Study Geography

The Saskatoon Star-Phoenix received a letter from the assistant editor of the National Geographic Magazine, Washington, D.C., in which reference was made throughout to "Saskatoon, British Columbia."

It is all the other information published in National Geographic is equally as accurate as the above, it is no cause for wonder that the Americans picture Canada only as a land of igloos and England as a country of bear rugs and blue-fours.

Keep Minard's in the Medicine chest.

Machinery For Shearing

Hand Clippers Used In Australia Only On Redleg Sheep

Australia's wool clip this season is estimated at about 900,000,000 lbs. from about 100,000,000 sheep. The great bulk of the shearing is done by machinery, although, in the case of pedigree sheep, hand-clippers are generally used to ensure a cleaner and more even cut. Wolsley, who invented the shearing machine, went to Australia from England in the middle of last century. He took up sheep farming soon after his arrival, and brought his first patent in 1874.

With the machine shears now in use, an average worker can cut 100 fleeces per day, and totals up to 200 are fairly common.

Ambitious Project

Plan To Pipe Gas From Alberta As Far East As Winnipeg

W. S. Herron, oil operator, announces that a plan for piping gas from Alberta to Winnipeg, serving also Regina, Moose Jaw and Saskatoon, is under consideration. He says that the cost would probably be \$50,000,000, and that eastern Canadian and N.Y. capital is interested.

After 16 Years Of Asthma Dr. J. D. Kellogg's Asthma Remedy proved the only relief for one grateful user, and this is but one case among many. Little wonder that it has now become the one recognized remedy on the market. It has earned its fame by its never failing effectiveness. It is earning it today, as it has done for years. It is the greatest asthma specific within the reach of suffering humanity.

Nothing is really attractive unless it has the element of risk. This makes one look to the future with melancholy. Every day things are being made safer and safer. Even aviation some day will be safe and sane. The sea is getting safer yearly. The risks of railroad travel are diminishing rapidly. What will our grandchildren do for their thrills?

Corn is caused by the pressure of tight boots, but no one need be troubled with them long when so simple a remedy as Holloway's Corn Remedy is available.

The Helpful Wife

Spouting Words Saleman—"Some thing in golf means 'I'."

Lady—"I want to see some large-sized handbags, please. My husband says that if he has a large enough handbag for tomorrow he'll win the game."

Minard's Lintment for sick animals.

The amusing part of it, says the Farmer's Advocate, is that some of those city fellows who know how a farm ought to be run, plant a bag of potatoes and harvest a bushel.

Mapping By Photography

The camera has been used by the Topographical Survey, Department of the Interior, as a means of gathering topographical data in the field for mapping purposes, for the last forty years.

6 Suggestions

Make Your Farm More Comfortable, More Livable and More Profitable with These Simple Spare-time Improvements

If you have any time on your hands here are six suggestions which will make an amazing difference in the attractiveness and efficiency of your farm.

First—Buy a supply of Gyproc Fireproof Wallboard. Then erect Gyproc partitions in your attic, changing the waste space into an additional room or two. Imagine how much more comfortable the family will be with the attic converted into a clean, inviting third story.

Second—Renovate the lower eaves by nailing Gyproc right over cracked and faded walls. You can decorate the flat, smooth Gyproc surfaces with Alabaster, paint or any other finish. And what a difference it will make to your home.

Third—Line your garage with Gyproc. Gyproc will make a fire-proof, cold resistant and a safe, more substantial home for your car.

Fourth—Gyproc your poultry house. Your flock will have better health, and year-long protection from fire, cold, heat and vermin.

Fifth—Line your grain-bin, barns, stables and other buildings with Gyproc. By doing so you will make them more valuable, fire-safe, cold resistant and 50 per cent more beautiful for your stock to live in.

Sixth—Look about for cracked, warped or rotted floors, partitions and ceilings and repair with Gyproc. Such repairs are quick and inexpensive to make because Gyproc sets, nails and cuts so easily—saving time and labor.

CANADA GYPROC AND ALABASTINE, LIMITED

Head Office: Montreal, Toronto, Windsor, Winnipeg, Vancouver

Fireproof Wallboard

DEFINES POSITION IN RESPECT TO LABOR MINISTRY

London, Eng.—Defining his attitude towards the new Labor ministry, Rt. Hon. David Lloyd George, Liberal leader, at a luncheon of the National Liberal Club said:

"We shall await with interest the forthcoming declarations of ministerial policy, but we must realize that as far as it lies in our power the mandate of the government ends when it fails to pursue a Liberal policy. The very hour the ministry decides to become a Socialist administration, its career ends."

"The result of the election," he said, "has elevated our party to a position of responsibility for national affairs, second only to that of the government of the day. During the life-time of the present Parliament, the final word in all questions of issues between the other two parties will rest with us. We must not use the power given us by the electorate in a paltry, fractious or pernickety spirit. We must interpret our responsibility in a large and generous way, that is, in the truly Liberal sense."

"This government has been called into being, not by the verdict of the nation, nor by the decision of parliament, but on the advice of the leaders of the Tory party. It has been brought into being by Mr. Baldwin's midwifery."

"The nation has declared by a majority of five million that the Socialists are no use for Socialism or the Socialist party."

"The trouble is this majority is made up almost entirely of Liberal votes and both the Tories and the Socialists are in a conspiracy to ignore the Liberals. Mr. MacDonald thanks the nation for the confidence placed in him, and even the Tory press assumes the national verdict indicated a preference for a Socialist administration. The existence of a party which has the support of 5,000,000 citizens is not taken into account by these two parties in their reckoning of the present situation or in their estimates of future prospects."

"The Liberals stand today between this country and out and out Socialism. Unconsciously the knowledge that they are there has already had its influence. Does anyone imagine this is the kind of ministry you would have if the Socialists had obtained an independent majority?"

Given Object Lesson

Pilgrims From Britain Come To Canada To Study Christian Unity

Ottawa, P.C.—The British Free Churches who have come to Canada to study and observe Canada's great experiment in Christian unity, church union, learned from the Prime Minister of Canada of other and even greater object lessons which this country is giving to the world.

Premier Mackenzie King in his address of welcome to the pilgrims at the Dominion Experimental Farm recently, traced briefly the history of relations between the French and English speaking citizens of Canada and stated that the great object lesson in Canada today was that people of two great religions and races could live together and work together for the common good.

Will Collect Oil Royalties

Government Will Put Regulation Into Effect Next January

Ottawa.—The regulation enabling the government to collect royalties on oil produced on Dominion Crown lands leased to private companies will be put into effect on January 1. Hon. Charles Stewart, minister of the interior, told the House in committee. The regulation which was passed some years ago, but has never been put into effect, provides that after a company has been producing oil for five years, a royalty not less than 2½ per cent. and not exceeding five per cent. of the output, or five per cent. of the sales of the product of the locality at the discretion of the minister shall be collected.

Urges Muskara Farming

Ottawa.—Steps for the development of the muskara industry were advocated in the House of Commons by M. N. Campbell (Prog. MacKenzie). Muskara could be raised very easily in the west on damp pieces of farm land, and government assistance by way of technical advice might be very valuable.

W. N. U. 1790

Arrange Direct Express Service From Europe

New Agreement Will Ensure Quick Despatch Of Parcels

Montreal, Que.—Arrangements have been completed between the International Des Wagons-Lits et des Grande Express Européennes and the Canadian Pacific Express Company for a direct express service from all European countries to Canada according to information received at Canadian Pacific express offices.

Parcels handed in at any of the offices of the Compagnie Internationale throughout Europe will be forwarded direct by the famous crack trains of that company to points where the Canadian Pacific Express maintain receiving offices, whence they will come to this country on Canadian Pacific steamers.

Sending parcels to Canada has been a somewhat hazardous business, at any rate from remote points in Europe where no adequate local express service is in operation. By virtue of the new agreement entered into by the two companies it will now be as safe and quick as sending a parcel from one's Canadian city to another.

Found Guilty Of Murder

Woman and Male Accomplice In Quebec Sentenced To Be Hanged

Hull, Que.—Philbert Lefebvre, and Mrs. Mary Vau Montpelier, Que., were found guilty at the Hull assizes of the murder of the woman's husband, Zephyr Vau, by poisoning, and were sentenced by Mr. Justice L. J. Loranger, to be hanged on Friday, August 23, at the Hull jail. The jury was out only 23 minutes.

In his charge, which lasted over an hour, Judge Loranger described the poisoning as one of the most despicable of crimes. There was no doubt, he said, that the murder had been planned for months.

The confessions of the accused showed that Lefebvre had provided Mrs. Vau with strychnine knowing for what purpose she would use it. Zephyr Vau had been very poor and every winter went away to work in a shanty. During his absence Lefebvre had visited the shack.

When asked if they had anything to say why the sentence of death should not be passed upon them, both prisoners muttered, "I am innocent and I ask for clemency."

New Grain Board

A Board Composed Of Younger Men To Be Appointed Soon

Ottawa.—The cabinet is now considering the appointment of a new board of grain commissioners. The members of the old board, it is understood, are to be retired, and a board composed of younger men is to take their places.

The only appointment seriously considered so far is that of a successor to Leslie Boyd, the chairman of the board, and, undoubtedly, this position will be offered to Mr. Justice Turgeon, of Saskatchewan. It is thought here, however, that he will decline to accept. In this event, it is not improbable that the post will be offered to Hon. Charles Stewart, minister of the interior.

Suggests Earlier Sessions

Ottawa.—A suggestion that in future parliamentary sessions should open in November and conclude on or about the first day of May, was made in the House of Commons by William Irvine, U.P.A., Wetaskiwin. Mr. Irvine expressed the opinion that the present practice of meeting parliament in February and continuing the session until well on in the summer months was an injustice to the western members and to those from the maritime provinces.

Drigible Goes On Strike

London, Eng.—Completion of the new British dirigible R-100 on schedule appeared impossible because of the failure to settle a strike of about 30 workmen. Officials at the Howden Airship Works said the strikers insisted that the dispute be settled through direct negotiations with the Union. The R-100 will be one of the largest airships in the world. It was to undergo tests next month.

No Increase For Judges

Ottawa.—Having learned that parliament would not support an increase in judges' salaries, he did not think it desirable to attempt to force such a measure through, declared Hon. Ernest Lapointe, minister of justice, in the House of Commons. When the time came, and parliament was in a mood to endorse such an increase, he would make no delay, the minister said.

Fliers Have Narrow Escape

Rescued By Canoeist When Plane Was Wrecked In Lac la Ronge

Prince Albert, Sask.—A small pontoon Moth plane of the Dominion Explorers Company, was wrecked in Lac la Ronge, and Pilot Kelly and one passenger had a narrow escape when they were rescued by a canoeist, according to reports reaching here.

The upper and lower wings of the aeroplane were wrecked and the machine damaged, generally when the plane struck the water and turned over. The pilot and passenger were thrown out into the lake and were picked up by the canoeist.

King Resumes Few Duties

In Now Able To Look After Part Of His Work

London, Eng.—King George is now sufficiently well to resume many of the functions delegated to him by a council of state, but will not yet assume his full duties.

Among the duties which His Majesty will now transact will be all business connected with dominion affairs. But it was presented to His Majesty, that, for the better preservation of his health, he should not for the time being resume all functions he had delegated.

MANITOBA MAY ACCEPT TERMS ON RESOURCES

Ottawa.—Terminating a political issue which has disturbed both provincial and federal politics for more than 40 years, the report of the Manitoba natural resources commission was tabled in parliament recently.

In brief, the report which consists of 46 printed pages, recommends: (1)—The payment in cash by the Dominion to Manitoba of \$4,584,212.49, as the balance due for past arrears.

(2)—The payment to Manitoba of \$562,500 annually, from now on, until the population of the province reaches 800,000.

(3)—Increase in this annual payment of \$750,000 when the population of Manitoba reaches 800,000.

(4)—Finally, when the population attains the figure of 1,200,000 an increase in the amount payable annually to Manitoba to \$1,125,000. This amount is to remain unchanged thereafter.

(5)—The wiping out hereafter of an amount of \$153,492.82 which has been deducted annually from the subsidy, being the interest on the monies received by the province from the sale of swamp lands, when these lands were under provincial control, and the capital sum set as the value of the 150,000 acres of land granted as an endowment to the University of Manitoba. Hereafter, this sum will not be deducted from the subsidy.

It is understood here that both the province and the Dominion have agreed to accept the recommendations of the commission, and that legislation implementing these recommendations will be introduced in parliament early in the season of 1930.

The probable effect of the report on the natural resources question as it affects Saskatchewan and Alberta was being canvassed here by the members of parliament. In regard to the payment of the subsidies with statutory increases in perpetuity, it was considered that the report would greatly assist the other two provinces to obtain such a settlement.

Eighteen "Count 'em", in One Family

The Clan MacLead arrived in Canada recently by the Canadian Pacific liner "Metagama"—at least it wasn't the whole clan. It seemed like a large proportion of it. Donald, his brother Kenneth, and his son Allan were leaders of the family group under Donald's command. Including grandchildren the party, which is bound on foot for Centreville, Ont., numbered twenty-four ranging in age from forty-five to six months. They had twenty-one pieces of baggage weighing 3,000 pounds.

IN BRACKEN CABINET

Hon. W. R. Clubb, who resigned from Bracken cabinet, Manitoba, during the Seven Sisters probe, has been reappointed minister of public works.

Sends Farewell Message

Stanley Baldwin and Premier King Exchange Greetings

Ottawa.—A farewell message which former Premier Stanley Baldwin sent to Premier Mackenzie King, on the day of Mr. Baldwin's resignation, and Mr. King's reply, were made public here. It was explained that publication of the telegrams was delayed until the prime minister's office here ascertained definitely that Mr. Baldwin's message was not intended as a purely personal communication.

Mr. Baldwin, under date of June 4th, cabled:

"I have today tendered my resignation to the King. On leaving office I should like to send you a message of farewell and sincere good wishes. It has been a great privilege to work in collaboration with you, and I wish to express my warmest thanks for your helpful co-operation during the last four and a half years, in all matters of common concern."

Mr. King replied:

"Your telegram, June 4th. May I express my deep appreciation of your message of farewell and good wishes. Throughout your tenure of office the most cordial relations have been maintained between His Majesty's governments in the United Kingdom and in Canada. It will always remain a source of deep gratification that I have been privileged to be associated with you in the many important matters of common interest that have marked these years."

Bisley Team Sails

Members From Canada Have Left For Southampton

Montreal.—Canada's 1929 Bisley team was given an enthusiastic send-off on board the Canadian Pacific liner "Montrose" on which the team has commenced its voyage to Southampton.

Members of the team include Captain W. C. Colquhoun, Esq., M.C.; Sgt. J. H. Regan, Victoria, B.C.; Lieut. D. Fyvie, Canadian Scottish, Victoria; Lieut-Col. R. M. Blair, Vancouver; Master Gunner S. Colliers, Esq., Montreal.

Lieut. Desmond Burke, Ottawa, a former winner of the King's Prize, will join the team in England.

Newspaper Man Promoted
Calgary, Alta.—W. J. Watson, who has been secretary-treasurer and also a director of the Calgary Herald since it passed into the present ownership in 1908, is leaving Calgary at the end of the month to take the position of assistant to the president of the Southern Publishing Company at the head office in Montreal.

Attacks Lloyd George

Former Chief Whip of Liberal Party Criticizes Methods Of Leader

London, Eng.—A lively attack on Rt. Hon. David Lloyd George, Liberal leader, is made in a letter to The Times by Vivian Phillips, former chief whip of the Liberal party. He says many Liberal candidates with whom he has talked since the election are of the opinion that Mr. Lloyd George is not an asset but a positive liability to the Liberal party. "Only courage will save the party now," he writes. "Courage to turn back on the shams and pretences of the past two years and make a new beginning under new leadership which will inspire public confidence and trust."

"If it will break loose from the degrading bondage of the party, if it will follow character rather than cleverness, if it will set honor and principle once again in the place which they have held in the days of its former greatness, it may yet be preserved to wield its old moral authority in the state and be an instrument of beneficent service to this nation and the world."

May Visit U.S. In July

Premier Ramsay MacDonald To Make Goodwill Visit This Summer

London, Eng.—Premier Ramsay MacDonald will pay his contemplated visit to the United States as soon as parliament has risen at the end of July, unless an adverse reason should suddenly intervene. It was generally held in authoritative quarters here that the departure at this time would leave him free for his projected visit in September to the League of Nations assembly meeting at Geneva.

The understanding is Premier Mackenzie King would represent Canada, if such an Anglo-American conference is held at Washington.

"I cannot make a statement of any kind tonight," Mr. MacDonald declared as he was leaving London with his daughter, Isabel, for his home in Lismouth.

The premier explained he was going to Lismouth in search of rest and he expected to return again before the opening of parliament, on June 25.

Sapiro To Visit West

Will Conduct Speaking Tour In Saskatchewan This Month

Saskatoon, Sask.—In the interests of the Wheat Pool and under the auspices of the United Farmers of Canada, Saskatchewan section, Aaron Sapiro will conduct a speaking tour of Saskatchewan during the latter part of June.

Mr. Sapiro will reach here on June 29 from the east and speak here on evening, June 27 he will speak at Weyburn. The date for his visit to Moose Jaw is not definitely set yet, but will be either June 28 or July 2. If he does not speak in Moose Jaw on June 28, he will probably visit Regina on that day. On June 29 he will be at Swift Current, and July 1 at Kerrobert.

ROYAL GRAIN COMMISSION TO CARRY ON WORK

Lethbridge.—The immediate program of the Saskatchewan Royal Grain Commission will not be affected in any way by the political crisis in Saskatchewan, and even should the government of Premier James G. Gardiner, which appointed the commissioners, resign within the next week or two, no anticipation of curtailment of the inquiry is feared.

This was the belief made known by Chief Justice Brown, commission chairman, while the body held sessions in Lethbridge.

The inquiry in Alberta will be concluded with a session at Medicine Hat. The commissioners then expect to enjoy a week's vacation before visiting four or five rural points in Manitoba, holding a brief session in Winnipeg and a two-weeks' probe at Port Arthur and Fort William. If any changes in this program are made they will be announced by whatever government is in power in Saskatchewan, Chief Justice Brown stated.

Complaints of car distribution, shortage of cars during the rush season, and leakages, were lodged before the commission. John Maynard, superintendent of the Ellison Milling Company here, recommended placing an inspector at each railway division point to check car leakage.

CANADA ACCORDS FAIR TREATMENT TO COMMUNISTS

Ottawa.—If there is any instance of a Communist having been unfairly treated, Hon. Ernest Lapointe, minister of justice, would like to hear it. This was what the minister told J. S. Woodworth (Labor, Winnipeg North Centre), in the House of Commons when the estimates of \$3,040,725.23 for the Royal Canadian Mounted Police were under review.

Mr. Woodworth had declared that the Communists were a political party, but information regarding their activities was being withheld from members of other political organizations. He charged that the government resorted to methods of sending spies to become members of the Communist party and incite to disorders. This was a questionable practice. The Communists were regarded by the government as a sort of bogey man to be trotted out as reactionary elements of the community.

Mr. Lapointe declared that the function of Mounted Police was to enforce federal law. If in the course of their activities they encountered situations contrary to the peace of the country, it was their duty to report. He knew no instance of a Communist having been unfairly treated. If such a one existed, he would be glad to hear it.

Minorities Trust Canada

Dominion Will Reap Harvest Of Goodwill Says Hon. Philippe Roy

Victoria, B.C.—The goodwill of the population are already looking to Canada as a strong advocate and a stout protector of their interests," Hon. Philippe Roy, Canadian minister to France, said in an interview here regarding the minority populations of Europe whose problems are now being considered by a special committee of the League of Nations.

"It must not be forgotten by Canadians," Mr. Roy said, "that there are 40,000,000 souls living in these European minorities. It is going to be a wonderful thing in a few years when Canada reaps the harvest of goodwill which has been sown by the announcement of Premier Mackenzie King, aligning Canada in support of the interests of the minority peoples."

"Turning to reparations, Mr. Roy said the recent settlement of the war indemnities in Europe was the greatest forward step achieved by the nations since the armistice."

Chinese Cured Of Leprosy

Treatment Carried On For Nine Years Was Successful

Victoria, B.C.—Smiling and happy after nine years of isolation on a small island off the Vancouver Island coast with only a few other sufferers for company, Lum Mah Ling, ex-leper, walked up the gang plank of the liner "President McKinley, a free man again, and bound home for China."

Ling had been at the lazarette for lepers on Bentinck Island, since 1920, when he was discovered working on a farm at Saanich, B.C., suffering from leprosy. He responded to constant treatment of chaulmoogra oil, and when released had been completely cured.

The departure of Ling left eleven lepers still on the island. Several of them are reported to be making favorable progress towards recovery, although a few years ago, their cases would have been regarded as hopeless.

Will Hold League Conference

Madrid.—The council of the League of Nations has decided to convoke a conference at Geneva on September 7, of all states adhering to the statute of the permanent court of international justice. Among the most important matters for consideration are changes designed to permit the accession of the United States to the world court. The council also decided to call a conference in Holland during the spring of 1930 on the codification of international law.

B.C. Mineralogist Dead

Victoria.—William Fleet Robertson, for twenty-three years provincial mineralogist, died recently at Everett, Wash., where he was taken ill while enroute to England via the Pacific Coast route from Victoria. Mr. Robertson was born in Montreal, 1859, and was widely known in the western American mining world. He retired in 1925.

Development of Highways In the Three Prairie Provinces Presents Difficult Problems

Before the end of 1929 there will be between four and five thousand miles of permanent highway in the prairie provinces. The problems connected with road building on the prairies have not been few. In the first place, the area to be served with even the most ordinary roads, was so immense. One of the first efforts of a community is to cut out a road connecting it with town and school and during the pioneering years there is little further work done. Possibly a few logs are laid across a water hole and some dirt thrown over. The technical name for this sort of road is "corduroy"—the reason is obvious and one's sensibilities are "touched" by the corduroy road, whether manoeuvred by lumber wagon or motor car.

But with the increase in motor cars, and the consequent increase in motor travel, there was an insistent demand for better roads, roads that would be possible in all sorts of weather. It costs time and money to be held up for several days or weeks, waiting for the roads to dry, so motorists, whether on business or pleasure bent, require all-weather roads.

Before the days of Government highways, and when all roads were under the jurisdiction of the municipal councils, some municipalities with a forward disposition made better roads than others. Some even put gravel on well graded and well drained surfaces, and so here and there would be a short stretch of permanent road. But the next municipality might have a council not interested in permanent roads, or it so wanted a road that ran north and south rather than one which went east and west connecting up with the road built by municipal "A." So these odd bits of good road helped not at all in the highway development of the province. It had to be a provincial government undertaking and a provincial plan, and an impetus was given by the grant offered to the provinces some years ago by the Dominion Government, and based on the standard of road. So an effort has been made to overcome the difficulties of roadmaking in alluvial silt in one place, or forest growing jumble in another, or wheat growing areas with countless rivers to cross in another, and the result will presently be a gravelled highway from Fort William to Vancouver through the southern parts of the provinces and a road from Winnipeg, northwest to Jasper, and some day on to Prince Rupert and down to Vancouver, making a huge triangle that will tap all the cities of Western Canada.

At present there are north and south gravelled highways from Emerson to Winnipeg; and then north to Lake Winnipeg; a road from Edmonton to Calgary, south to the International Boundary, and north to Athabasca Landing, to which the Athabasca River makes a big southerly sweep before passing north again toward its ultimate goal in the Arctic Ocean. There its waters finally empty after some twenty-five hundred miles of wandering through and around mountains, vast miles of forests and millions of tons of tail sands which some day will provide the covering for all weather roads throughout the prairies.

Already the traffic is so heavy on some of these prairie highways that the governments are worried over the necessity of incurring further capital expenditure for asphalt roads, since it is an economic fact that when the traffic exceeds a certain number of cars a day, it is more economical to have paver roads than to pay the cost of upkeep on gravelled roads.

Each province has its own road policy, but in each the effort is to provide all-weather trunk highways which are of the best use to the people living within the province as well as to the tourist and also provide good market roads for those who have made their homes within that province. Each is groping for some system of conserving gravel highways, and each is hesitating over the

tremendous capital expenditure of paving. But no universal is the traffic on Western Canada roads that if some of these oil schemes do not prove themselves shortly, it will be necessary to pave.—Montreal Herald.

Might Work Another Way

Canada's Attitude Toward Titles Should Apply To Honorary Degrees

One Canadian university which in past years has been decidedly free with honorary degrees announced that it would confer none in June of the present year, wherefore many people of the Dominion will feel constrained to break into loud applause. Knighthoods have been abolished in Canada, and it is high time that Canadian universities ceased creating any more LL.D.'s. Of course there are knighthoods that would be approved on all sides, just as there are honorary degrees that would commend themselves to everybody, but the trouble is that both the King's advisers and men at the head of universities have often shown a want of discrimination.

Not Becoming Wealthy

So Far Lindbergh's Official Position Has Netted Him Nothing
Charles A. Lindbergh is not getting rich very fast from his position as adviser on aeronautics to the Department of Commerce.

Assistant Secretary MacCracken said Lindbergh has not drawn one cent in salary since his appointment five months ago.

He is allowed \$25 a day when his services are sought by the Commerce Department. Otherwise he gets nothing. MacCracken explained that no problem had arisen which required Lindbergh's advice.

Winnipeg Newspaper Union

SMART BLOOMER DRESSES

Printed linen takes its place in the mode and is used for a most unusual bloomer dress for the growing miss of 6, 8, 10, 12 and 14 years. The back of waist extends over shirred front, forming yoke effect. The short puffed sleeves are a new style feature. Collar can be made in plain or scalloped outline. The attached two-piece skirt with smartly pressed plait, allows plenty of freedom for the activities of youth. Pattern No. 821 consists of dress and bloomers. For the 8 year size it requires 2½ yds. of 35-inch material with ¼ yard of 15-inch contrasting. Printed sateen, chambray, silk, silk, cotton broadcloth, checked, gingham, printed crepe de chine and printed cotton foulard are smart. Price 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

We suggest that when you send for this pattern, you enclose 10 cents additional for a copy of our Spring Fashion Magazine. It's just filled with delightful styles, including smart ensembles, and cute designs for the kiddies.

Philanthropist

W. H. Askew, wealthy Laird of Ladykirk, near Berwick, who is devoting large sums of money for the purpose of enabling worthy British to come to Canada in agricultural placement, arranged by the Department of Colonization and Development, Canadian Pacific Railway. "Make good," said Askew to a large group of colonists whose movement he made possible, "and you will be giving me all the thanks I ask."

Trying To Develop

Hardier Strawberries

Plant Breeders Are Now Turning To Wild Variety

All the strawberries in Canada and the United States and most of the world—that is, the cultivated ones—are descendants of two wild strawberries, one a native of the Pacific Coast, and the other a native of the eastern United States.

There are many other wild strawberries, however, that did not take part in developing our present kinds. In the untamed wild one may find some valuable trait that can be bred into our domestic varieties which may make them even more desirable than they now are. At any rate, plant breeders are turning to the wild sorts for proving the strawberry, especially to develop new types better adapted to such specific purposes as canning, preserving and candy making.

A Long Story

Don't get impatient if you find serial stories in newspapers and magazines rather long. Suppose you get interested in "The Mountain Pass" and wanted to finish it. This historical novel by Nakazato Katsun Miyako, a Tokyo newspaper, and the end is nowhere in sight. Up to date the story fills 25 volumes.

Would Care For Blind

The Manitoba government is anxious to have the old age pensions act extended to blind persons needing assistance. Hon. W. J. Major, attorney-general of that province, urged the extension on Hon. Peter Heenan, minister of labor. Mr. Heenan promised sympathetic consideration when in Ottawa.

Educational Films

Excellent Films Supplied By the Government Should Be Shown

As for the other matter, the type of moving pictures presented to Canadian audiences, an interesting and valuable suggestion is made—namely, that the excellent films in possession of the governments—Dominion and provincial—which are at present available for exhibition in the schools, should be shown also to the general public. Whenever there is a suggestion of "educational" films, the answer is always made that the producers and theatre managers are catering to popular taste—that it is a case of supply and demand. But there is little doubt that the appetite for low-grade pictures grows by what it feeds on. The sentimental, nauseating rubbish which is served up to patrons has a vitiating effect, especially on immature minds. The suggestion made by Col. C. R. McCullough, that one of the local school auditoriums might be engaged for a weekly showing of these interesting government films has much merit; it should, at any rate, be possible to make suitable arrangements.—Hamilton Spectator.

Stubble Burning Warning

Extra Precautions To Be Taken Against Spread Of Fire

"Exercise care in stubble burning. Running fires cause damage to the property of others." This is the tenor of a province-wide educational campaign which has been instituted by the Fire Commissioner of Saskatchewan in an attempt to reduce the fire losses from stubble burning which have been alarmingly high during recent years.

The Prairie and Forest Fires Act requires that the stubble to be burnt must be completely surrounded by a fire-guard not less than 20 feet in width, and the fire must be guarded by three adult persons. This law, in the future, is to be more stringently enforced.

Where combines or swathers have been used and the stubble is longer than ordinary, the Fire Commissioner warns extra precaution should be taken.

Finds Ivory In Yukon

Most ivory hunters go to Africa and shoot elephant, but Jack Elliott seeks his prize in the valleys of the Yukon, and the tusks and bones he finds there belong to animals that have been dead for thousands of years. Elliott went into the Yukon when the first flush of the gold excitement had passed. He did not find gold as hundreds of his predecessors had failed to do, but he did dig in the creek beds and he found another treasure there.

Prodigal—Father, I've a notion to settle down and go in, for raising chickens.

Father—Better try owls. Their hours would suit you better.

The best way to avoid tire troubles is to ride in a friend's car.

SHORT BUT TRICKY

No. 4, Cavell—230 yards, Par 3.

This hole on the Jasper Park Lodge Golf Course, Jasper National Park, Alberta, over which the Canadian and Western Canada Amateur Championships will be played from Aug. 19-24 this summer, is more difficult than it seems. The green is well trapped and the long driver is sure to find trouble.

The fact that the Western Canada Amateur also takes place over this course at the same time as the Dominion event, assures all golfers, no matter how high their handicap, of lots of competitive play.

The photograph shows the hole from No. 1 (championship) tee, and the panel is the hole in detail, with yardages to scale below it.

Believed Fort Norman Region Offers a Great Oil Reserve Which May Be Used in Future

Closely Connected With

Agricultural Market

Empire's Greatest Hotel Will Buy

Bulk Of Supplies In Canada

That the erection of the tallest building in the British Empire should have any direct connection with the market for Canadian agricultural and food products of the highest quality is something not directly apparent on the face of it. The tallest building in the Empire is, however, also the Empire's greatest hotel, the Royal York in Toronto, which was recently opened. The Royal York's annual bill for foodstuffs will be in the neighborhood of \$750,000, the great proportion of it to be spent in Ontario or the Dominion as a whole.

Live lobsters will come from the Maritimes in special crates three times a week. Salmon from the Saguenay is already ordered. Hundreds of gallons of the finest Canadian maple syrup will be used in the creation of special Canadian dishes. A supply of millions of ultra-fresh eggs is secured. Canadian beef and lamb, selected on the hoof, can be equalled nowhere else. Canadian fruits and vegetables will be brought from various sections of the Dominion famed for their own particular output. As a matter of fact, a palatable survey of Canadian delicacies has been made on behalf of the new hotel with the idea of bringing out dishes and produce to the attention of many thousands of visitors annually. Investigation has shown how surprisingly few materials have to be imported even to cater to the fastidious taste of the gourmet who has eaten excellently in all parts of the civilized globe.

Investigate Clay Resources

Survey To Be Undertaken In Saskatchewan This Season

Survey and test of the clay and other non-metallic mineral resources of Saskatchewan, conducted during recent years by Prof. W. G. Worcester, of the Ceramics Department, University of Saskatchewan, under auspices and direction of the Provincial Department of Railways, Labor and Industries, will be continued during this summer.

A tentative programme of investigation, exploration and test already has been prepared for the summer's work. This calls for a brief reconnaissance survey along new branches of the Canadian Pacific Railway in the Wood Mountain district, whence samples of clays, bentonites and volcanic ash will be taken. That work completed, a more rigorous survey in the Cypress Hills area probably will be undertaken, the oil signs in this area attracting to it special attention, while it is also proposed to investigate the clays in the white mud beds of the Frenchman River.

The programme as outlined envisages a survey of the non-metallic materials in the more favourable districts of Northern Saskatchewan, which attention is directed by the possibility of early railway transportation. The Rottenstone Lake and Lac la Ronge areas will be covered, as also will the territory which the proposed railway line will traverse.

Must Work On Roads

Every man in Yugoslavia must give his services for six days in every year for road making, according to a new Government decree. Owners of auto trucks and horse-drawn wagons must lend their vehicles for three days each year. According to Premier Jivkovic, the country's most pressing need is a first-class modern system of roads.

A small "cracking" plant of sufficient capacity to distill gasoline for the motor boats which ply the Mackenzie River during summer may be built this summer a short distance from the Arctic sea.

The Hudson's Bay Company boats which leave McMurray and Fort Smith on their voyage down to the Arctic may carry the nucleus of this refinery. The company has investigated the feasibility of taking such a plant into the high north, and it held probable that within this present year crude oil from Canada's highest north oil fields will be supplying gasoline and other fuel for the various shipping and other operations in the north.

Just before the war the late Dr. T. O. Bosworth, well-known British geologist, visited the far north, making his way down the Mackenzie to the Arctic. He came back with news of possible oil structures near Fort Norman. Then came the war and it was not until 1919 that the Imperial Oil Limited, sent in a crew with a light drilling rig. As may be imagined, the transportation problem into this country was daunting.

On what was afterwards known as Discovery Range, fifty-three miles north of Fort Norman, the crew drilled the first well to a depth of 910 feet, at which mark they struck oil sand with a gas flow. This well flowed in "heads" or spasmodically when enough pressure collected to force the oil to the surface. Rumors floated up the river to the south of a big oil gusher and a rush for the field was started, men making their way in even during the winter months. The well actually did increase production to about 100 barrels of high grade crude oil after being deepened.

Imperial Oil Limited, pushed its development work with enthusiasm and kept sending in new rigs and material over the 1,400 miles of wilderness between Edmonton and Fort Norman. One season they used airplanes to help them with their communications. In one season eight bills alone amounted to \$140,000.

Several dry holes were abandoned at other points along the river, but Discovery No. 1 increased production and Discovery No. 2 was drilled.

It is the opinion of many oil men that the Fort Norman region offers a great reserve of oil on which Canada may draw in the future. With mining development, pushing towards the Arctic, it is not too much to predict that before many years away means will be found to bring the Arctic petroleum to market.

Fort Norman oil is 35.6 degrees Baumé gravity, with paraffin base and is extremely high in gasoline content. It remains fluid at 90 degrees below zero, having a natural temperature of 12 degrees above zero Fahrenheit.

Could Pool Resources

Frank: "Is it true that you are engaged to three other men besides me?"
Frances: "Why?"
"Well, I was thinking the four of us might raise enough by clubbing together to buy you an engagement ring."

"You look very sad."
"So would you Be, I dreamed that I should die in a week."
"When did you dream that?"
"A month ago."—Moustique, Charlerol.

THE DEBUTANT—Sondagnaise Strix, Stockholm.

Aviation In South America

Air Lines In Operation In Every Country Of South America

By the end of 1928, it will be possible to travel by air from Montreal to Santiago, Chile, across the Andes to Buenos Aires and to return via the Brazilian coast to New York and Montreal. There are air lines in every country of South America, and many of them are in daily use. This great improvement in the communication facilities of the continent has been made in the past eight years, before which period no commercial aircraft were in operation, and already its influence upon the development of South American republics is apparent.

On that vast continent where the population is engaged chiefly in the production of raw materials and where distances between large centres of population are so great, development is particularly dependent on the means of communication and transportation. Argentina has the most extensive railway system of any country south of the United States, and her rivers are navigable the year round. This may have much to do with the fact that her foreign trade is over 50 per cent of the total commerce of the continent, and that among the nations of the world she ranks as thirteenth in per capita trade. Other countries on the continent have not the topography favourable to the building and maintaining of surface transportation, the costly and difficult nature of which has been an important factor in their rapid advance in the field of aviation.

The greatest development in aerial transport in South America is found in Colombia, and Peru, the rich, mountainous countries of the north and west. Colombia's main artery of communication is the Magdalena River, whose shallowness has made the introduction of supplementary facilities essential. This need has given the country precedence in South American aviation, both in priority and in efficiency. — Royal Bank Monthly Letter.

Hazards In The Home

Accidents Happen Just Wherever You Happen To Meet Them

The man who feels safe just because he is at home is an optimist. Accidents occurring at home make up a large part of accident statistics. Actually the home is not so hazardous as a factory, but there are plenty of opportunities to slip, trip or get scalded or burned. The force of gravity will pull you down to earth just as hard at home as at the shop. Careless use of fire or scalding liquids will result in destruction in either place. A noted "human fry" tumbled down a stairway at his home and broke his ankle. Steel workers who walk about on narrow girders high up in the air have most of their falls right down on the ground. A washing machine is not in the same class as a pump, press or circular saw, but they do mangle many hands. The reason for all this seems to be that we are alert to the little hazards but often close our eyes to the little dangers in the lurk at every hand. In all up-to-date factories, inspections are held regularly to see that machines and equipment are in safe operating condition. In the average home no one is responsible for maintaining safe conditions. Many days lost from work are due to an injury at home.—Border Cities Star.

Gaining In Popularity

It is evident from an official report recently issued that the bicycle is gaining in popularity in Canada. In 1928 the production of bicycles in Canada reached a new high record, with the selling value of products 52 per cent higher than in 1927. Last year 27,599 "wheels," as bicycles are popularly termed, were sold by Canadian manufacturers, valued at \$599,480.

"Mention a single good deed you have ever done?"
"I prevented you from becoming an old maid."—Felix Mele, Paris.

W. N. U. 1790

Increasing Bee Colonies

The Better Way Considered To Be Division

Beekeepers multiply their colonies by either of two systems. The bees may be allowed to swarm or the colonies may be divided by the beekeeper, and queens added when necessary. At the Scott, Saskatchewan, experimental station, swarming is not permitted, as it is considered a better way to increase by division. In the report of the station for last year the superintendent explains two systems that are followed, one of dequeening and requeening, and the other separation of queen and brood. In the first of these methods the queen is removed and all queen cells are destroyed. The colony is left queenless for ten days when all queen cells are again destroyed and a young laying queen introduced. Where this system was followed in the Scott station no further signs of swarming were evident during the season. The other system is to separate the queen and brood. This plan is preferred by many beekeepers on the grounds that it is more easily done and is very effective. The procedure is to destroy all queen cells and move all brood to an empty super above the honey super, leaving only one frame of stores in the lower chamber with the old queen. The remainder of the brood chamber is filled with drawn comb or foundation. At the end of a week all queen cells are again destroyed. These, the superintendent points out, are to be found in the old brood chamber above. As soon as the larvae hatch in the old brood chamber, the combs are cleaned by the bees and used for the storage of honey. Swarming was overcome in all the colonies treated in this way at the Scott station carried on other work in apiculture management described in this report available at the Publications Branch of the Department of Agriculture, at Ottawa.

Rich Amber Deposits

One Of The World's Richest Deposits Is Located In Northern Manitoba

What is believed to be one of the world's richest deposits of amber lies along the shores of Cedar Lake, Manitoba, located about 20 miles southeast of The Pas and close to Lake Winnipeg. For generations the Indians gathered amber there. Some of the pieces found are as large as a robin's egg and vary from pale yellow to dark brown in colour. In one case ten per cent of the material of the beach is made up of amber.

Reports on these amber deposits were made to the Canadian Government over 50 years ago, but advice was against the exploiting of this field on account of the impossibility of bringing machinery 1,000 miles overland from Eastern Canada or the United States. The situation is now entirely changed. The proposed Bay Railway is less than 30 miles away with connection at The Pas with the Canadian National Railway direct line to Winnipeg.

With the exception of the amber deposit near Albany, N.Y., the other deposits of any consequence are in Russia. The best grade of amber is used for beads, ornaments, and pipe stems, and the inferior grade for varnishes.

Whether the Cedar Lake amber deposits will eventually be profitably developed remains to be seen, but Manitoba still grows millions of bushels of amber coloured wheat for which it has become famous throughout the world.

A Growing Grain Port

The steady extension of the cultivated area in Alberta is an assurance of Vancouver's continued growth as grain port. The shipment of grain from this province to the head of the lakes is a thing of the past. The opening up of the famous Peace River country will contribute to the volume of western grain shipments, and the increasing demand in the Orient for Canadian wheat is another important factor in stimulating the trend of wheat westward to the sea.—Calgary Herald.

Limited To Pleasant Things

Police court news is dreary stuff, but the other day there was one twinkling bit of gold among the dullness. An old lady was asked by counsel: "Will you be able to hear my questions?"

She replied: "If I am not asked anything unpleasant."

What a sensible old lady, and doubtless what a happy old lady!

A party of Americans were being shown over an historic ruin. "This," said the guide, pointing to a massive archway, "goes back to William the Conqueror."

"Why?" inquired one of the tourists. "don't it?"

Report Is Most Favorable

Expedition Found Route From Churchill To Europe Feasible

Scarcely a hint of danger is contained in the "blue book" reports of the leader and the logs of the ships which carried the Hudson Strait expedition of 1927-28 to the Far North on its perilous undertaking. The modest report of N. B. McLean, leader of the enterprise, conducted under the direction of the dominion government, and the logs, have just been made public. Accompanying Mr. McLean were his assistants, flying officers and the crews of the stout vessels which kept McLean in contact with the outside world until one of the great adventures of modern times concluded its labors on November 14 last.

The purpose of the expedition was to establish the feasibility of a ship route from Port Churchill, through the waters of Hudson Bay, thence down Hudson Strait and to the ports of Europe. It was the work of the expedition to investigate ice conditions and the difficulties with which commerce would have to contend in tapping the newly constructed Hudson Bay Railway. The course on which winged ships of the Hudson's Bay Company were set 200 years ago was the same one the expedition followed. But they explored it, charted it from the air for the most part. They discovered, in brief, that there was a reasonable period of time when navigation was possible, ice-breakers would be necessary to keep the ship lane clear for a longer season and guides for shipping would have to be erected; but over the same channel the clipper ships of two centuries ago sailed with their crews of adventurers, the future lane of commerce could be established.

There will be a sequel to this story of the exploration of the Hudson Straits. It will be written into Canada's history by men who guide the nation's commerce.

Won Victory Over Blindness

Louis Braille Conquered Loneliness Suffered By the Sightless

This year is the centenary of one of the world's most famous victories. It was not won by an Admiral or Field-Marshal, but by a blind professor, and the thing he conquered was the loneliness of blind people.

Louis Braille was his name, and he lost his sight at the age of three, yet he became an organist in a Paris church and a teacher in a school for blind children. While he was there he invented a system of six raised dots, whereby it was possible to embody music, literature, and numerals. The terrible loneliness of the blind who were hitherto cut off from the thoughts of the world unless some friend would read to them was now at an end.

Knew It Was Serious

Lady: I hope you realize, Mary that matrimony is a serious matter? Maid (about to be married): Oh, yes, ma'am. I've been to two fortune tellers and a clairvoyant, and looked in a sign book and dreamed on a lock of his hair, and been to a palmist, and they all say it's all right. I ain't no to marry reckless, ma'am.

Hawaii's sugar crop this year weighed 850,000 tons.

More New Canadians

This picture taken on the arrival of the S.S. Melita shows one of the families brought to the Dominion under the Askew scheme. Laird of Ladykirk, Scotland, V. W. H. Askew, provided the amount of \$10,000 to enable desirable British agriculturists to come to the Dominion. Automatically a further \$10,000 was made available under the terms of The Empire Settlement Act. The recruitment and all administrative features are being handled by the Colonization Department of the Canadian Pacific. The gossamer young gentleman in the foreground reflects the attitude of a well-seasoned traveller.

Keeping Interest In Horse Industry Alive

Large Number Of Entries In Yearly Parades In Cities

Organized horse parades wherever they are held do much to keep alive the interest in the horse industry. They do more than this in inspiring better horsemanship. The cities of Montreal, Toronto and Ottawa make an annual feature of the horse parade that each year surprises even the citizens of the respective cities with the place that the horse still holds in the commerce and pleasure of a modern city. Toronto many years ago established the horse parade and chose Dominion Day for its celebration. Montreal and Ottawa selected Empire Day for this event.

The Ottawa parade was in the hands of a committee including officials of the Central Canada Exhibition, the Winter Fair, the branches of the Government concerned with the live stock industry, and the Royal Canadian Mounted Police. In the Ottawa parade there were 412 horses brought out under most favorable conditions. It was evident that the horsemen had been preparing for weeks for the display, as with but rare exceptions every animal was at least in good flesh, thoroughly groomed and harnessed in faultless style. Practically every conveyance had been freshly painted and the drivers attired in most cases in suitable uniforms. The procession was escorted and kept in order by officers of the Royal Mounted Police on horses of unusual quality and training.

A bewildering array of cups and prizes were given to proud drivers and owners, one of the most popular being a special prize for "Jim," a horse which had to his credit 26 years in harness. One of the drivers with 48 years service with one company also received recognition.

With the multiplying of motor vehicles, particularly in the towns and cities, the opinion may be reached that the horse is ceasing to hold a place of any considerable importance in the urban life and business of the country. Horse parades like those held in the principal cities serve to convince those who experience anxiety for this useful friend of man that the day of his ultimate passing if it ever comes is still a long way off.

Alberta Park Survey

Appointment at Edmonton of John D. Robertson, deputy minister of public works; Horace Seymour, provincial planning commissioner, and Richard Andrew Smith, solicitor to the executive council, as a special committee to survey the entire province of Alberta and report to the executive council on sites suitable for the location of public parks, was announced by Premier J. E. Brownlee.

Will Use Aeroplanes

The Dominion Government is to lend two aeroplanes to assist in the joint survey of the Pacific Great Eastern Railway which is being made by the Province of British Columbia and the two transcontinental railways. Premier S. F. Tolmie said on his arrival back here from the east. "This assistance will be of great value," he said.

The Immigration Officer—No money, no friends, no job, and expect to land? I see your fault.

The Prospective Citizen—No, excellence, not Finnish, Lettish.

Marry and Live Longer

But German Experts Are Not Sure Of Their Content

Marriage makes for longevity. On the average married persons live five years longer than those not tied by marital bonds. They can expect to live to be 69 years while bachelors and spinsters cannot be given more than 64 years in this world.

Those figures are taken from the latest publication of the official German statistical bureau—volume 401 of "Statistics of the German Reich"—and judging by the maze of figures, calculations, and complications, it appears that the German experts have made a thorough job of it.

A close perusal of all these figures cannot but convince the skeptical that married people live longer. But what actually makes for their greater longevity? The German publication fails to give a clear-cut answer. The experts who compiled and sifted all this material apparently did not want to commit themselves, instead resorting, to a certain extent, to explanations in the form of "maybes."

Home-life with its regularity such as the roving bachelor will never enjoy, is held responsible to some extent. Yet is it really? The German experts themselves seem to doubt it. Almost in the same breath in which they tell of the greater longevity of married people they admit that the figures, which apparently prove this fact beyond doubt, may be influenced by factors which have nothing directly to do with married life.

As a rule, people who marry enjoy a good health. Weaklings—from a medical standpoint that is— and people suffering from diseases frequently do with marry. Now it must be taken for granted that of the latter category more die at an earlier stage of life than the healthy—that is those who marry. Hence it must also be taken for granted that this fact has, or at least might have, an unfavorable influence on the statistical life-index of unmarried people.

In another sector of this latest publication of the German statistical bureau are presented death-rate figures of the last six decades which show that man has gained twenty years of life during the 60 years.

Anxious To Visit Canada

Oxford Student Intends To Secure Work In Harvest Fields

Having failed to win one of the 50 travel scholarships offered last summer by the Allied Newspapers in co-operation with the Canadian National Railways, H. A. Fountain, of Oxford, has decided that he will come to Canada this summer as a self-appointed "Young Ambassador."

Like many others who took part in this travel scholarship scheme, Mr. Fountain found that the work entailed in answering the questions was a great educational experience and he became so interested in Canada's development that he decided he would visit the country on his own at the first opportunity.

Mr. Fountain has accordingly written to the Canadian National Railways to see if some arrangement can be made for him to go to Canada this summer as a student harvester to work in the harvest fields and earn enough money to pay his passage.

Where Canada Leads

Canada Received Last Year More Than Half The Immigrants To Countries Within The Empire

Canada is the only Dominion that recorded an increase in British immigration in 1928. British Government figures, received by the Department of Immigration at Ottawa, give a total of 54,700 coming to Canada last year as compared with 52,916 in 1927. Canada thus was therefore more than half the entire movement of 108,982 persons from Great Britain and Northern Ireland to countries within the Empire.

Guards Not Tall Enough

The former Kaiser's 70th birthday recalled an anecdote to H. A. Van Coten, consul from the Netherlands in San Francisco.

"In the days of glory," Consul Van Coten said, "the Kaiser, during a visit to The Hague, boasted at great length to Queen Wilhelmina about the military equipment and skill and bravery of the German Army."

"Do you realize," he wound up, "that my Prussian Guards stand 7 feet in their stockings?"

"That is not tall enough," said the Queen.

"How do you mean—not tall enough?" said the Kaiser.

"When we open our dykes," said the Queen, "the water is 10 feet deep."

"During the dullest season his customers grow."

"Why does he sell?"

"Clothing for children!"

Great Test Of Personality

How Many People Are Really Comfortable To Live With

Are you comfortable to live with? "Why, of course, I am!" you say, rather indignantly; then you stop wonderingly and ask: "But what do you mean by 'comfortable to live with'?" Isn't everybody that with people when they know?"

"Well, of course, we all have different ideas of comfort, but I think it takes a really clever person to be comfortable to live with. Not the bookish kind of cleverness that has a lot of letters after the name and takes a prominent position, though these are not barred, but qualities of the heart, in the first place, such as sympathy, tact and understanding. The brain, also, has its place; in fact, everything best in heart and brain has to be exercised if one is to be really comfortable to live with."

It comes easy to some people who have the great gift of adaptability, with no awkward corners or crooked places in their characters; but most of us have moods and are very trying sometimes with a marked tendency to show when we are "rubbed up the wrong way."

The dictionary gives the meaning of comfortable as "pleasing," "satisfying," "comfortable," "giving satisfaction." According to that definition, how many of us touch the mark?

Surely that gift of being "comfortable to live with" is a great one. In office, shop, or workroom, how often one comes across people who annoy by their very presence, and we shun them without quite knowing why? A case of "Dr. Fell," I suppose.

Then in quite an unexpected way the difficulties are across people who the way cleared for us by some sweet person whom we had overlooked, as we are so often do the valuable things of life, fixing our eyes on the ends of the earth, so to speak, thinking everything else away.

Such is the beneficial effect of those who are comfortable to live with that after a talk with them we go away refreshed and heartened to fight life's battles anew, our jaded souls and bodies rested, our frayed nerves soothed by their sane practical help. No boosh about them, but everything honest and straightforward. No petty rancor or angry words and nagging tongue, no reaping up past quarrels, but absolute forgetfulness of injuries. Living one day at a time, able to hold their own without being aggressive, unassuming, but not servile, cheerful and sincere, they are a perfect joy to meet.

Reader, is the standard too high? We are but human, and can only do our best. But surely we can all do that, and then we shall certainly be "comfortable to live with."

Had Power Of Intuition

General Foch Jumped To Conclusions and Was Usually Right

Sir Henry Wilson said that Foch differed from all other generals he had met, because of his remarkable powers of intuition. He reasoned up to a point and then made a mental jump to a conclusion which was invariably right. At a vital moment in the war in 1918, all the other generals who met in conference were in favor of a certain course. Foch disagreed. After listening to them he said, "I still maintain my opinion and intend to act on it." He did. Wilson said, "The result showed that he was right and we were all wrong. What courage!"

Effect Of Sunspots On Precipitation

The Dominion Observatory, Ottawa, has recently commenced co-operative investigations of tree growth and forest fires with lumber and forestry interests. It is significant that, in certain localities of Canada, forest fires were numerous in 1923, a dry year at sunspot minimum, while they were relatively few in 1928, a summer of many rains at the maximum of sunspots.

The average weight of an elephant is about five tons.

"I say, what fool 'shaved you'?"
"I shaved myself!"—Nagels Lustig, West, Berlin.

WORLD HAPPENINGS
BRIEFLY TOLD

Newfoundland's recently authorized \$6,000,000 five per cent. loan was awarded to the Bank of Montreal on a bid of 98.25. The government regarded the terms as favorable.

Prince Charles, second son of King Albert, was fined 100 francs (about \$4), for not voting in the Belgian provincial election in accordance with Belgian law.

Caught between a conveyor and a mixer in the Flin Flon mine plant, Jacob Holt was dragged to his death. His clothing became caught in the bucket carrying device when he was working about the machine.

Some early moves looking to reduction of international naval armament are confidently expected in informed circles at Washington, to be made by the United States and Great Britain.

The Ontario Government's agreement with the Federal government on old age pensions was formally signed by Premier G. Howard Ferguson, and Hon. Peter Heenan, federal minister of labor. The act becomes operative November 1.

One of the largest diamonds found in the South African fields was recently brought to Kimberley from Barkley West for valuation. It weighed thirty-three and one quarter carats and sold for \$13,300. This is believed to be a record price per carat—\$400.

Baking tests of Garnet wheat, shortly are to be carried out in the United Kingdom, and will be observed by L. H. Newman, Dominion cerealist, who leaves from Montreal, on the Montrose. Mr. Newman may go to Hamburg and other European grain markets.

Channel Tunnel Plan Favored

Would Help To Solve Unemployment Problem In Britain

Construction of a tunnel under the English Channel to connect England and France by rail is one of the schemes which Rt. Hon. J. H. Thomas has his eye on in connection with his plans to solve the British unemployment problem. Mr. Thomas has been delegated by the new premier, Rt. Hon. J. Ramsay MacDonald, to direct the new Labor government's work in dealing with the unemployment situation.

He is organizing a new government department of employment and is obtaining reports on a number of projects which might supply work for some of the men now unemployed as a preliminary to calling in experts from all the government departments.

With the aid of the experts he hopes to frame definite plans for road-building, housing development and railway reconstruction. At the same time he is not to forget emigration and the development of the Empire and the part they may be made to play in reducing the army of unemployed.

Products Of Canada's Farms

The four leading items in the total agricultural production of Canada in 1928, valued in all at \$1,730,304,000 are: Field crops, \$1,099,781,000; dairy products, \$250,000,000; farm animals, \$197,880,000, and poultry and eggs, \$106,654,000. Last year was the first year for poultry and eggs to exceed \$100,000,000 in value. Since 1923 these have increased in value from \$62,000,000. Value of farm animals in five years has advanced \$72,000,000.

Most Obedient

Mamma: "And were you a nice boy at the party?"

Bobby: "Yes mamma."

Mamma: "You didn't ask twice for anything at the table, did you?"

Bobby: "No, I didn't, I asked once, and they didn't hear me, so I just helped myself."

"What has happened to you? Shall I take you home to your wife?" "Thanks. I have just come from there."—Buen Humor, Madrid.

W. N. U. 1790

A Forest Of 2,000 B.C.

Ancient Douglas Fir Standing At Bottom Of Lake In Oregon

An unexplored wilderness of Douglas fir trees stands upright on the bottom of Clear Lake, in Linn County, Oregon—probably green and flourishing in 2,000 B.C. These firs, we are told by John D. Guthrie, writing in American Forests (Washington), were growing in a little valley high up in the Cascade Range, when, about 2,000 B.C., or before, there were eruptions from many peaks along the crest. The peaks belched forth lava, and the molten stream spread out over thousands of acres. A tongue of this flow must have run into the little valley of the McKeanie, and almost filled it. Then:

"The heat may have killed the Douglas firs in the valley, or they may have been literally drowned by rising waters. In any case, the river gradually filled the little valley above the lava dam, submerging the fir trees, and formed a lake about a mile long.

"The Douglas fir trees are still standing on the bottom of the lake. The waters are the coldest of any of the Cascade's lakes, and crystal-blue, so that the bottom, shining white with the volcanic ash of long ago, seems but a few feet below you. With the air excluded, these old trees have been perfectly preserved through all these centuries, and today the wood is readily identified. It is as sound as ever, with no breaking down of the woody tissues whatever, nor any evidence of infiltration of any kind."—Literary Digest.

To Protect Civilians

International Red Cross Commission Will Start World-Wide Propaganda

A world-wide campaign for the protection of civil populations against the future possibilities of aerial and chemical warfare is to be inaugurated soon by the International Red Cross Commission. The movement will take two forms—world-wide propaganda to acquaint civil populations with the dangers of aerial and chemical warfare and world-wide competitions for the perfection of new means of defense against such attacks.

You'll be attracted by its simple sophisticated lines with Vionnet neckline and lower edge of bodice at waistline shirred with bow trimming. It adapts itself beautifully to the season's newest fabrics in printed silk crepe, plain silk crepe, printed rayon, crepe satin, crepe de chine, rayon printed voile, handkerchief linen, printed pique, gingham check in cotton or silk crepe, georgette crepe, and canton-faille crepe. Style No. 462 is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. It is made with 1 1/2 yards of 40-inch material with 1/2 yard of 36-inch contrasting in the 36-inch size. Just two major parts to pattern, which means practically only one and a shoulder seams to join. Price 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

We suggest that when you send for this pattern, you enclose 10 cents additional for a copy of our Spring Fashion Magazine. It's just filled with delightful styles, including smart ensembles, and cute designs for the kiddies.

Recipes For This Week

(By Betty Barclay)

OATMEAL DROP CAKES

1/2 cup butter.
1 cup sugar.
2 eggs.
1/4 cup milk.
2 cups rolled oats.
2 1/2 cups flour.
1 teaspoon baking powder.
1/2 teaspoon salt.
1 teaspoon cinnamon.
1 teaspoon nutmeg.
1 cup chopped seeded raisins.

Cream butter, add sugar, eggs well beaten, milk and rolled oats. Mix and sift dry ingredients. Add flour mixture to first mixture, thoroughly mix. Drop by spoonfuls on a greased baking pan and bake in a rather hot oven. This makes 32 to 36 cookies.

NEW YORK SALAD

4 slices pineapple.
1/2 cup celery.
1/2 cup nuts chopped.
2 oranges.
Cream mayonnaise.
Lettuce.

Arrange slices of pineapple on nests of lettuce leaves. Cut celery in slender strips, one and one-half inches long, and mix with nut meats. Pile in centre of pineapple, and garnish with four sections of orange, free from membrane, laid symmetrically on pineapple. Pass dressing separately.

'Talkie' Novels Now

People Can Enjoy Book Without Trouble Of Reading It

Talkie novels have come as the natural sequence to talkie movies. The first talkie novel is a story "Arabian," by Andre Cayatte, and has been put up in a series of phonograph records, each record containing a chapter. The story is related by the author.

Several others are in preparation, but the plan has been changed by using men and women to recite the lines of the characters of the novel, to do away with "says she" and "says he."

Editors of the talkie novels predict a great future, principally because it will now be possible to enjoy a book without even the effort of turning every page.

New Yorks Are Common

Americans may believe there is only one New York, but England has three and Scotland one. England recently claimed a New York in Kent, Lincolnshire and Northumberland, counties and immediately all good Scotchmen pointed to their New York on the western shores of Loch Awe.

Offered High Position

Clarence Chamberlain, trans-Atlantic flyer, wants a young woman secretary who will do her stenographic stuff in the air. He is willing to "iron out" the bumps and make the work as pleasant as possible. His frequent and long-distance flights, he says, necessitates the engagement of an air secretary.

SUNDAY SCHOOL LESSON

JUNE 23

PSALM OF PRAISE

Golden Text: "Bless Jehovah, O my soul."—Psalm 103:1.
Lesson: Psalm 103:1-22.
Devotional Reading: Psalm 107:23-31.

Explanations and Comments

"Gratitude and Praise" For God's Mercies, verses 1-5:—"Bless Jehovah, O my soul"; thus the Psalmist addresses himself. "The Psalmist languages have no word for 'self.' If the Syrian has to render 'a kingdom divided against itself,' it says 'a kingdom divided against its soul.' If it has to render 'yourself,' it must needs say 'your soul.' And all that is within me—my whole self, my whole being, all my faculties and powers—bless His holy name. As we have often noted, 'name' stands for person; thus Him who is holy.

It takes all the heart and devotion to one's family or country."

Bless Jehovah, O my soul, and forget not all His benefits. Forget none of them: take none of them for granted. How often is forgetfulness the cause of ingratitude!

"I believe thanksgiving to be a greater mark of holiness than any other part of worship."—McLeod. In the two clauses of verse 3, and the first clause of verse 4, Professor Drummond notes in the last part of each, three facts of similarity—the guilt of sin, the stain of sin, and the power of sin; and in the first part of each, three facts of salvation—forgiveness, healing, and redemption. Who forgetteth all these iniquities, thy crookedness, thy sin! Who heareth all thy diseases.

"God's goodness is not like the nature God's own healing touch? Had He not endowed our bodies with that which restores them from accident and sickness, no bone would ever set, no wound ever close, no patient ever recover. And so it is with the deeper maladies of the soul."—W. L. Watkinson.

"Who redeemeth thy life (thyself), from destruction. Destruction, or the pit, Revised Version. 'It stands for Sin.' 'Who is here pictured as claiming the Psalmist when on the point of dying; but Jehovah paid, as it were, the ransom and so brought him back to health and life. 'Redeem' or 'ransom,' is here used figuratively."—T. W. Davies. Who crowneth thee with lovingkindness and tender mercies.

"God's goodness is not like the barometer—sometimes high, sometimes low, sometimes doubtful. It is the constant quality on which we can ever rely."

Who satisfieth thy desire with good things, so that thy youth is renewed like the eagle. "Make thee young and lusty as an eagle."—Coverdale. The eagle is selected as "the liveliest image of strength and vigor." "Pensioners who are provided for after this royal fashion preserve their brightness and youthfulness. They mould, the ageing influences of the years, and every day God imparts a new freshness to their lives."—Thomas Phillips. Compare Isaiah 40:31.

"I believe that God forgives all my iniquities, heals all my diseases, renews my life from destruction, crowns me with lovingkindness and tender mercies, and fills my years with good so that my youth is renewed like the eagle, not because I read the story of this experience in the Psalms, but because I experience it in my own life; but perhaps I should never have experienced it in my own life if I had not first read it in the Psalms."—Lyman Abbott.

Sambo: "What an dis yeah millenium that Oh don't hear folks talkin' about?"
Rastus: "Yoh also is a millenium, boy, yoh also is. Why, a millenium, only it don't have no 'lugs'."

Canada's most northerly government office is at Bache Peninsula, Ellesmere Island, 79 degrees 04 minutes north latitude, within 800 miles of the Pole.

WINDOLITE

MADE IN ENGLAND

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, school factories, hospitals, auditoriums, hotel beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 lbs. with a square yard of glass of ordinary thickness weighs about 135 to 150 lbs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

Use WINDOLITE and let YOUR PLANTS YOUR CHICKENS YOUR CATTLE Bask in 100 % Sunlight Send for booklet "WINDOLITE"

Opportunity for
British Traders

Canada Offers Good Market For Empire Made Goods

The great bulk of Canadian imports come from the United States, a nation which has pursued a consistently selfish, if not hostile tariff course toward this country. Sentiment in Canada is strongly in favor of the purchase of British goods rather than American. The opportunity is here for British traders to capitalize on this sentiment. To do so, they must take a leaf out of the American's book. They must send representatives here to get into close touch with Canadian conditions and market requirements. More vigorous merchandising methods are essential. The appointment of an agent in Montreal or Toronto to look after the entire Canadian market is an obsolete arrangement. There must be more vigorous commercial penetration and the results will justify the cost.—Calgary Herald.

Phosphates For Fertilizers

Manufacture Of Fertilizers On A Large Scale To Be Carried On In B.C.

The vast supplies of phosphates in British Columbia, to be converted to fertilizer by the Consolidated Mining and Smelting Company, will save the "wheat sick" parts of the grain belt in Western Canada, said C. C. Belmont, of Victoria, formerly member of the Canadian Grain Commission, the other day. "The ally," he said, "The manufacture of fertilizer on a large scale will be the greatest salvation the western provinces have ever known. It will cause an increased yield, an earlier harvest, closer settlement and bring a reduction of taxation."

A Large Order

Mrs. High-Tighty: "And these are all the vacuum cleaners you have?"

Dealer: "Yes, madam, I have shown you all we carry."

Mrs. High-Tighty: "Well, I'm afraid they won't suit. I want one from the Louis XV. period to match my antiques."

"Nurse," said an amorous patient, "I'm in love with you. I don't want to get well."

"Cheer up, you won't," she assured him. "The doctor's in love with me, too, and he saw you kiss me this morning."

Bill: "With who was your wife quarrelling last night?"

Albert: "Oh—er—she was scolding the dog."

Bill: "Poor beast—I heard her threaten to take the front door key away from him."

A lot of people would have fewer troubles if they would think less about the injustices of life and work more.

Only choice leaves grown at high altitudes go into the blending of Blue Ribbon Tea. That is why its flavour is so uniformly excellent. Insist upon getting it from your grocer—refuse substitutes of inferior quality.

The Desert Song

—BY—
VIRGINIA MORRIS

Copyright 1929 Warner Bros. Pictures, Inc.

"The Desert Song" is a Warner Bros. production of this story. It is based upon the story by Otto Harbach, Laurence Schwab, Oscar Hammerstein, and Frank Mandel.

CHAPTER V.—Continued.

An hour later the Red Shadow received from his host the advice that the French girl was alone in the upper chamber. He found this room to be a gorgeous apartment lighted by great oriental lamps that burned live coals and suffused a room. Margot was sitting on a low silk couch. Her dusty riding habit had been exchanged for a flimsy chiffon skirt that revealed every line of her alluring body. A narrow pearl bodice took the place of a waist and her bare arms were brazeleted with broad bands of precious stones. She was far more beautiful in eastern garb than the Red Shadow had even seen her before.

"Why did you bring me here?" was Margot's first question when the Red Shadow entered. She arose from the couch and stood in a defiant attitude.

"Why?" he replied. "To teach you to love me, so fiercely that you could give up home and friends. Call it a mad dream, but mad as it is I'm willing to risk my whole future to make it come true!"

"Leave love out of it," she answered. "I hate you! I love Paul!"

But the Red Shadow knew better. With a final positiveness, he told her, "You do not—love him! Come to me!"

His persuasiveness had not won her, for she shrank from him. "Tell me one good reason why you will not," he insisted.

"Why there . . . there are many!"

"Give me one!"

"Why I love . . . I love Pierre Birabeau. I know that I do. Once I dreamed of romance and adventure, but I've had enough of it. I want the quiet life that Pierre planned for me!"

The Red Shadow made an impulsive attempt to take her in his arms, but before he could do so the door burst open and All Ben All entered—followed by—General Birabeau!

The shock motioned to them, "Believe me, I wish to prove myself a friend of the French. You see my people are innocent. He stole her . . . I know nothing!"

The Riffs along with All Ben All's men, now crowded into the room. General Birabeau turned to the owner of the desert palace. "Sir, Azur guided me here," he explained. "I've come alone—and I want to take this girl back with me!"

Birabeau walked directly to the masked leader of the Riffs. "Azur tells me that you've boasted that no man can beat you in single combat. Well, I am going to kill you or you will have to kill me!"

For the first time the Riffs saw the Red Shadow turn pale and shrink back from a challenge. Without explanation he ignored the insult of the Frenchman. Even Birabeau was agast with astonishment.

All Ben All, who knew the ruthless code of the desert, warned the masked man. "What has come over you, friend? Your own followers will send you out in the wilderness to die if you do not fight!"

Still the Red Shadow made no attempt to defend his honor. General Birabeau, nevertheless, would not let the outlaw leave him.

"So this is the famous Red Shadow?" he sneered. "The myth that has frightened all Morocco! I think you're a coward!"

Margot ran between the two men. "Please don't, General!" she begged. But the commandant pushed her aside roughly. Then reaching in his belt, he drew out his glove and struck the Red Shadow in the face!

CHAPTER VI.

A dreary day passed for Margot. She was back at the garbion in Fes but she knew that the total happiness of life had been left back there in All Ben All's palace. Her dream of romance was all but fulfilled and yet she herself had been the one to reject it. Her desert love had told her that no other man had ever said—that he was willing to risk his whole future to have her as his own. The contempt with which she had treated him now made her heart ache.

Although All Ben All had granted General Birabeau, Bennie, Susan and herself safe conduct back to Fes, she had heard the dreadful fate that the Riffs had meted out to the Red Shadow. The law of their tribe had left them no choice. Their leader had allowed an enemy to dishonor him and there was the inevitable punishment that Allah had ordained.

The disgraced one was sent out into the desert, alone, without food, without water, with no weapon of defence but his broken sword. And those men who had been his loyal soldiers, those men who had loved him as a blood brother, stood watching silently until he had disappeared over the crest of the farthest hill. Later they would choose a new leader but now they turned their faces toward Mecca and prayed.

For hours Margot had stared into the desert to find a distraction for his chatter, for the night the Red Shadow had kidnapped her he had taken a boat for Tangiers. The thought of Pierre puzzled her. Although she felt herself madly infatuated with the outlaw, she believed that sincerity had prompted her to tell him she longed for the safety that life with Pierre would mean. Her heart was a maze of contradictions but, after all, nothing could matter much now.

She did not hear Captain Paul Fontaine enter. He startled her when he sat on the arm of her chair and tried to take her hand.

"Please, don't, Paul," she protested wearily.

Fontaine's face flushed with jealousy. "I know you're not happy. It's because the Red Shadow is in danger. You've fallen in love with him!"

Margot turned her head and looked at him defiantly. "What if I have?"

Their quarrel was interrupted by the arrival of General Birabeau. "Paul, the command to take the Red

Shadow a prisoner is changed. He is not to be brought in alive!"

Fontaine smiled but Margot jumped to her feet and exclaimed, "But the man you're after is alone and unarmed! You cannot be cowards enough to kill him!"

"Go, Paul, you have heard my orders!" insisted the General. But he was not devoid of sympathy for the girl, for his subordinate left, he turned to her: "Margot, I advise you to give up this dream of romance. It has caused you enough heartache."

Thinking it was kinder to leave her alone, he disappeared suitably to the garden. The girl resumed her vigil, scanning the desert spaces she knew not for what. Afternoon darkened to dusk and dusk darkened to evening. Then, out of the stillness, cries of the returning soldiers were heard. A moment later Captain Fontaine burst into the room and the instant that Margot saw his face she knew that his mission had been successful. He was followed by General Birabeau, who asked, "Tell me what happened?"

"We killed him!"

"Who? Which one of the soldiers?" the commandant enquired.

Paul Fontaine hesitated. "None of our soldiers. But the last man you would ever suspect."

The door opened and Pierre Birabeau stood before them. Over his arm was the cloak and the mask of the Red Shadow and his hand held the outlaw's broken sword. Gradually his father realized the daring of the son he had almost despised. It was he who had killed the dreaded enemy. In a rush of emotion he put his arms around the boy and held him close. Then another realization slowly possessed him, for he whispered so that only Pierre could hear, "You were braver when you refused to fight!"

That evening Pierre Birabeau was the acknowledged hero of the post. Margot alone failed to congratulate him. The General, bursting with pride, at the bravery of his own boy, urged him to tell the girl the details of his amazing exploit. As he left the room he saw Pierre put his arm around Margot Bonvallet—and he had never dared do that before!

"Margot," Pierre began, "I think you're a coward!"

"Please, Pierre—don't tell me anything more. I—I want to be left alone."

"But answer just one question, Margot, and then I will go. Did you love this man very much?"

There were tears in the girl's eyes. "Yes, I loved him—as I never will love anyone else."

Pierre did as he had promised. He went quietly from the room. When she knew that she was alone Margot gave way to all the despair that had been stifling her since the night before, since she started back over the desert, leaving the Red Shadow to face the horrible punishment he could not escape. Her own sob's prevented her hearing the door through which Pierre went open again. She felt a hand on her shoulder. At first it seemed impossible—it was the distorted imagining of her broken heart. But when she felt his lips against hers she knew that it was true. The Red Shadow—her lover—was there, dressed in his scarlet, his face hidden by the mask he had always worn.

Then, after that long embrace, she lifted the mask. And she knew that the greatest romance of all was ahead—the tempestuous love of the Red Shadow and the protecting tenderness of Pierre.

THE END

Had No Moving Problems

Family Pays Rent Fifty-Nine Years On Same House

For one family to pay rent of one house for a period of fifty-nine years is a pretty good record, and that is the record revealed by the announcement that Fred R. Allen, 59, of Farmington, Me., is going to move for the first time.

He is living in a house where his father began paying rent before Fred was born, and after the death of his parents he continued to live there. The house is to be torn down, and so Mr. Allen has to move.

The Mediterranean has very slight tides, at most places only a few inches.

The Home Of Porcelain

Saxony Town 500 Years Old In Planning Celebration

Meissen, a beautiful town in Saxony, one of the first places in Europe, if not the first, where porcelain was manufactured, is 500 years old this year. All kinds of celebrations have been planned for this anniversary, among them chimes of real porcelain bells, the first of the kind in the world, to be hung in a Meissen belfry. But the most remarkable commemoration is a war memorial chapel of porcelain. The whole interior has been lined with porcelain, and large commemorative groups have been fashioned in china clay, colored and baked to reproduce the interior. The man who first made "Dresden China" was named Böttcher.

When Baby Is Well Mother Is Happy

The happy mother is the one whose baby is well—it is the laughing, curling baby who always brings joy to the home. When baby is ill everyone in the home suffers—ill only through worry over the little one but through loss of sleep—no one can find rest with a sick baby in the home. Thousands of mothers are happy mothers because they have found the way to keep their little ones well—or if sickness does come on suddenly, as it usually does with little ones, it is the laughing, curling baby who always brings joy to the home. When baby is ill everyone in the home suffers—ill only through worry over the little one but through loss of sleep—no one can find rest with a sick baby in the home. Thousands of mothers are happy mothers because they have found the way to keep their little ones well—or if sickness does come on suddenly, as it usually does with little ones, it is the laughing, curling baby who always brings joy to the home. When baby is ill everyone in the home suffers—ill only through worry over the little one but through loss of sleep—no one can find rest with a sick baby in the home. Thousands of mothers are happy mothers because they have found the way to keep their little ones well—or if sickness does come on suddenly, as it usually does with little ones, it is the laughing, curling baby who always brings joy to the home.

Little Helps For This Week

"He giveth power to the faint, and to them that have no might He increaseth strength."—Isaiah xl. 29.

It is not, Lord, that I have fearful grown To walk the way I must; But oh! the path is steep that I must tread.

And often in the dust I fall, my feet are bleeding from the stones, And all my tears are vain; Forgive, I pray, dear Lord, and give me strength; Thy strength to rise again.

Whether we stumble, or whether we fall, we must only think of rising again and going on in our course. God never makes us feel our weakness, but that we may be led to seek strength from Him.—Fenelon.

It is impossible for that man to despair who remembers that his Helper is omnipotent.—Jeremy Taylor.

Wellington, N.Z., is constructing a war memorial which will have a carillon.

Newspapers Best Medium

More Money Spent On Newspaper Advertising Than In Any Other Way

One billion five hundred million dollars was spent on advertising in the United States during 1927, according to a survey made by the National Bureau of Economic Research at Washington. The report contains a chapter by Professor Melvin T. Copeland, of Harvard University, who points out that advertising not only stimulates buying, but acts as a stabilizing influence on certain industries.

That newspapers are the best medium through which advertisers may reach ultimate customers is shown by the amounts spent in the States in the year under review, for each class of advertising. Newspapers, \$686,000,000; magazines, \$219,000,000; direct advertising, \$400,000,000; street car cards, \$20,000,000; outdoor 000 (since greatly increased); advertising, \$75,000,000; radio \$7,000,000 (since greatly increased); business papers, \$75,000,000; and premium advertising, program and directories, \$25,000,000.—Edmonton Journal.

Honey Production

Honey production, in Canada in 1928, amounted to 22,489,900 pounds worth \$2,785,467, as compared with 23,194,493 pounds worth \$2,936,558 in 1927, and 13,769,649 pounds worth \$1,920,948 in 1926. A feature of recent years has been the rise of the western provinces in honey production.

We met a friend the other day whose wife had been ill with a bad cold a week or so before. "Did your wife ever get her voice back?" we inquired. "All of it," the friend replied.

Polish Universal Exhibition

Canada Sending Valuable Exhibits Which Will Advertise This Country

Saskatchewan has contributed to the Canadian exhibit to be displayed at the Polish Universal Exhibition, being held from May to September of this year at Poznan, the University City of Poland. The Dominion Government, several other provinces, the railway companies and the Hudson's Bay Company also have contributed. Other countries participating include Great Britain, Holland, Russia, Turkey, Japan, China, United States, Brazil, Argentina, Chile, France, Italy, Germany, Belgium and Czechoslovakia.

The Canadian exhibits will illustrate the mode of living of the Polish-Canadians in city and country. The Dominion Government, apart from contributing models exhibiting the agricultural, mineral and industrial wealth of the country, is donating a group of Canadian buffaloes. The Canadian Railway system will exhibit illustrations of the "stations, shops, bridges, tunnels, irrigation projects, etc."

The Province of Saskatchewan is providing delightfully colored transparencies, complete with electrical fittings in readiness for erection, showing public buildings, including the Parliament Buildings, University, Colleges, Normal Schools, Hospitals, together with a group of sixty large photographs, uniformly mounted, providing views of Saskatchewan farming operations, scenes and livestock. To each individual photograph is attached a description written in English, French and Polish. It was interesting to find, in translating the descriptions, that no such word as "Combine" has yet found a place in the Polish language. Handsome glass cases carrying the Saskatchewan "cost-of-arms" will contain exhibits of Saskatchewan-grown wheat, oats, barley, flax and peas. The Provincial Museum has provided mounted specimens of fur and bird life to be found in the Province.

Mathematical Genius

Six Year Old Danish Boy Has Distinguished Scientific

Danish scientists have been dumfounded by the mental antics of a six-year-old mathematical genius, Paul Larsen, whose father is a modest tailor in the village of Hvidovre. On a recent visit to Copenhagen the clubby little fellow multiplied figures with products as high as 10,000. Most of his answers were given in less than ten seconds, and if the calculations of his inquirers may be relied upon, all of them were accurate. According to his proud father, Paul has displayed his ability at arithmetic since he passed his fourth birthday, and no one has ever taken particular pains to train his mind in that direction. When he is not performing for curious visitors, the child spends his time playing about the streets of his native village.

ope of the N.E. Qr. 18 and the S.E.
Qr. 19 marked "Tender for the Fur-
ar, 19-28-5-W5th Mer."
Address tenders and enquiries to
The Soldier Settlement Board of
Canada
Southern Bldg., Calgary, Alta.

SETTLERS
Guard your
Slash Fires!

Wood is the settler's winter harvest. When his own
land is cleared he may still obtain employment in the
neighbouring forest. By care with fire, the wise
settler protects his own living.

Issued by authority of
Honourable Charles Stewart,
Minister of the Interior.

Alberta Institute of Co-operation

Lethbridge Olds Vermilion
JUNE 24th - 29th, 1929

Arrangements have been completed for the holding of
three separate institutes of co-operation in the province, sim-
ilar to the one which proved so successful at Edmonton last
year.

The meetings will be addressed by speakers who are
outstanding authorities on various phases of co-operation
in many parts of the continent, and special attention will be
paid to the problems in co-operation affecting Alberta farm-
ers. The co-operative marketing of wheat, livestock, dairy
products, and poultry and eggs, and the consumers' co-op-
erative movement will be considered and discussed.

Special arrangements are being made for the junior
section of the Institutes, and for the instructions and enter-
tainments of the young people who will attend

Plan to attend the institute nearest your home, and in
order to ensure accommodation, communicate at an early
date with the registrar—

Crossfield Leading The Rosebud League

Defeats Didsbury on Monday Evening

Crossfield since last week has won another league game, defeat-
ing Didsbury on Monday evening by a score 14 to 3. The game was
fairly even up to the seventh inning, when Crossfield went on a batting
rampage and scored seven runs in the lucky old seventh. Johnson on
the mound and C. Guertin receiving for the locals, worked well. This
gives Crossfield twelve wins out of thirteen games played.

Innisfail is holding second place in the Rosebud League, and they
expect to hand Crossfield a defeat on Wednesday, June 26th, at Cross-
field. This will be a hard battle as both teams need this win.

Carstairs Stampede, Thursday July 4th Will Be Big Event

The Carstairs Stampede to be held on Thursday, July 4th, will be
one of the best events held in Alberta (second to the Calgary
Stampede). This is the seventh annual Stampede and each year it gets
bigger and better than ever with added attractions which will surpass
any previous year's attempt.
